

NGUYEN THANH THIEN

Ngu Hanh Son, Da Nang • thanhthien0706.developer@gmail.com • 0373245002
github.com/thanhthien0706 • thanhthien-profile.vercel.app

Full-stack Developer with 3+ years of experience delivering robust web applications. Skilled in modern frontend/backend stacks and AI-assisted engineering (Cursor, Claude) for rapid, high-quality development, aiming toward a Solution Architect role.

WORK EXPERIENCE

Freelancer Developer

Jan 2022 - Present

Freelance

Freelance

- Skills: **HTML5/CSS3, SASS, React, Node.js, Vue, JavaScript, TypeScript, Cursor, Claude**
- Built and customized responsive websites and high-converting landing pages for 15+ clients, cutting turnaround time by 40% using AI-assisted engineering workflows (Cursor, Claude).
- Developed custom automation scripts and RESTful data-dispatching tools (Node.js) to automate business processes, saving clients an average of 10+ hours per week of manual data entry.
- Maintained a 100% on-time milestone completion rate and over 95% client satisfaction score across all contract deliverables.

SOFTWARE ENGINEER

Sep 2022 - Jun 2026

Napa Global

Da Nang

- Skills: **ASP.Net, C#, Reactjs, Javascript, Typescript, SQL Server, Nodejs, Nestjs, Nextjs, SSRS, SSIS, Blockchain...**
- Participated in the development of a blockchain project using Golang, focused on USDT trading.
- Collaborated with a cross-functional team to deliver a product tracking system for Seven-Eleven stores, enhancing inventory management efficiency.
- Develop products to track imported and exported products at Seven-Eleven stores.
- Participate in database design and solutions for the project.
- Participate in maintaining and developing features of old projects, such as: Adding features to the Access App, creating / Editing reports with Report Builder / SSRS, and creating/editing automatic jobs of SSIS.
- Support deploying products to Production and Staging environments.
- Reduced website load time (from 15 minutes to 3 minutes) through content optimization and implementation of lazy loading techniques, helping to improve user experience, and solving timeout and out-of-memory issues.
- Participate in projects following the Agile Scrum model.
- Integrate the login feature with Microsoft Azure and Sync data from Stripe.
- Perfecting the UI from Figma

JUNIOR SOFTWARE ENGINEER

Aug 2025 - Dec 2025

Da Nang Statistics Office

Da Nang

- Skills: **Typescript, C#, Sql Server, API, DevExpress**
- Developed responsive web forms and dynamic statistical dashboards using DevExpress and C#, cutting monthly reporting turnaround time by 35% across internal departments.
- Analyzed and optimized SQL Server queries and indexing strategies, reducing data aggregation query execution time by 40% for large statistical datasets.
- Conducted vulnerability assessments and security testing for web portals and mobile services, identifying and resolving over 15 potential security risks prior to production rollout.

INTERN BACKEND ENGINEER

Jul 2022 - Aug 2022

FPT Software

Da Nang

- Skills: **Spring Boot, Java, HTML/CSS, RESTful API, Trello**
- Analyzed system requirements and developed RESTful API endpoints using Spring Boot, achieving 100% on-schedule delivery for assigned backend modules.
- Authored comprehensive API documentation and Postman collections, accelerating frontend-backend integration and cutting onboarding testing time by 25%.
- Managed daily task workflows and sprint backlogs via Trello within an Agile environment, actively contributing to team code reviews and technical discussions.

PROJECTS

Personal Project: WILDLIFE PROTECTION WEBSITE [↗](#)

- Link: <https://vue-app-love-us-new.vercel.app/>
- Built a Wildlife Protection Website featuring user authentication, dynamic blogs, interactive games, and detailed organization information. Implemented using VueJS, NodeJS with Express, MongoDB, significantly enhancing awareness about wildlife conservation.
- Description of main functions:
 - Register, log in, manage blogs, play games,...
 - View organization information,...
- Technologies **Vuejs, Scss, Javascript, some support libraries, Nodejs (Expressjs framework), MongoDB, some support libraries,...**

Personal Project: GỖI ĐẦU GIƯỜNG – DIGITAL BOOKSTORE & AUTOMATED CHECKOUT [↗](#)

- Link: <https://goidaugiuong.site/>
- Built an SEO-driven landing platform and automated fulfillment pipeline for digital e-books, focused on driving organic search visibility, high conversion rates, and instant digital delivery upon successful payment.

Description of main functions:

- Publish SEO-optimized book introductions, content previews, and promotional landing sections to capture organic traffic.
- Frictionless checkout flow generating dynamic banking QR codes with unique transaction content.
- Webhook listener processing real-time bank transfer notifications to verify payment status and match book SKUs.
- Automated delivery service emailing Google Drive download links to customers instantly after payment verification.
- Technologies: **Sepay, HTML5, CSS3, JavaScript, Google Apps Script, Google Sheets API, Webhooks, RESTful API, AI-assisted development tools (Cursor, Claude),**

SKILLS

Languages & Frameworks: TypeScript, JavaScript, C# (.NET), React.js, Next.js, Node.js, Nest.js, RestAPI, GraphQL, Expressjs, SASS

Test: Unit test with Jest, Vitest, xUnit.

Database: PostgreSQL, SQL Server, MySQL, MongoDB, Redis

AI-Assisted & Developer Tools: Claude Code, Antigravity, Cursor, ChatGPT, Prompt Engineering for Code Refactoring & Testing.

EDUCATION

Software Engineer Jan 2020 - May 2025

VIET-HAN UNIVERSITY

Major: SoftWare Engineer

Master Front End & Vuejs Jul 2021 - Feb 2022

GENETIC - COMPUTER & LANGUAGES

LANGUAGES

English (Limited working proficiency)
